What is claimed is:

- 1. A multi-port connector comprising a plurality of openings, each of said plurality of openings having at least two jack connectors therein.
- 2. The multi-port connector of claim 1, wherein each of said at least two jack connectors has a set of flexible spring wire contacts for forming electrical connections with electrical contacts on a plug.
- 3. The multi-port connector of claim 1, wherein each of said at least two jack connectors has a latch protrusion for locking with a resilient latching arm on a plug.
- 4. The multi-port connector of claim 1, wherein each of said at least two jack connectors has guiding surfaces for guiding the plug into proper mating position.
- 5. The multi-port connector of claim 1, further comprising an internal shield between the at least two jack connectors.
- 6. The multi-port connector of claim 1, wherein said at least two jack connectors are RJ connectors.
